DATA SHEET

Extra Small Enclosure

The Extra Small Enclosure is fabricated in the same robust style as the Small, Medium & Extra Large Low Profile Enclosures. The Extra Small Enclosure uses the same mounting plate as the current 995200 series of Small Enclosure and is designed to house Inner Range LAN modules that are either powered via the LAN or an external plug pack or 3rd party power supply.

The Extra Small Enclosure is a versatile enclosure that will house a range of small size PCB's, and also provides an antenna mounting solution for wireless products such as Multipath-IP T4000 Security Communicators.

Specifications

Physical

Enclosure Size	252(L) x 263(W) x 85(D) (mm)
