

Excel Category 5e (UTP) Low Profile Toolless Jack - White

100-202-WT

Features

- ISO, EN & TIA compliant
- Choice of colours
- Low Profile - 28mm overall depth
- Delta 3rd Party Verified
- Supports Gigabit Ethernet

Product Overview

The Excel Category 5e Low Profile Unscreened Keystone Jack, is a reduced size toolless termination RJ45 socket. The reduced size allows for multiple cable entry directions to be accommodated when this jack is mounted in a standard depth back box. This permits many mounting options including flush shutters at the outlet as well as more common angled shutter used with keystone jacks.

The low profile design allows this jack to fit in the Excel 0.5U 24 Port Patch Panel resulting in a maximum port density of 48 per 1U. The socket itself is housed in a high quality fire retardant plastic cast housing, which opens at the rear in a butterfly manner to reveal the IDC termination points.

Features	
1: Category	5E
2: Model	Jack
3: Type of connector	RJ45 8(8)
4: Connection type	Insulation displacement
5: Colour	White
6: AWG-range	22...26
7: Shielded	no
8: Suitable for round cable	yes
9: Suitable for flat cable	no
10: Suitable for solid core	yes
11: Special tool necessary	no
