

SP-4002

OUTDOOR SIREN WITH OPTICAL AND ACOUSTICAL SIGNALING (BATTERY BACK-UP)

SP-4002 is an optical-acoustic siren designed for outdoor installation, provided with super bright LEDs and a piezoelectric transducer. It offers three types of 120 dB intensity modulated tones to choose from. This model is designed to work with a 1.3 Ah, 6 V gel lead-acid battery, which is installed inside the enclosure and serves as a backup power supply. Enclosure of the siren is made of polycarbonate, which ensures high mechanical strength and aesthetic appearance of the device that remains unchanged over time. A simple, yet attractive design of the enclosure makes it ideal even for a modern façade. The device is provided with tamper protection against opening or tearing off the wall, and the inner shield of galvanized sheet additionally protects the electronics board and transducer against mechanical damage. The electronic circuits are properly weatherproofed, so they are also resistant to the effects of harsh environmental conditions.

- microprocessor controlled
- acoustical signaling: piezo transducer
- optical signaling: ultra bright LEDs
- inner metal shield
- tamper protection against opening and removing from mounting surface
- sealed lead acid back up battery included

The SP-4002 optical-acoustic siren is available in three color versions: **SP-4002 R (red)**, **SP-4002 BL (blue)** and **SP-4002 O (orange)**.

TECHNICAL DATA

Environmental class	III
Enclosure dimensions	148 x 254 x 64 mm
Operating temperature range	-35...+55 °C
Nominal supply voltage (±15%)	12 V DC
Max. current consumption	260 mA
Weight	1200 g
The intensity of sound	120 dB

The actual appearance of the products may differ from the presented images. Product descriptions are provided in the web service for information purposes only.
