

RECORDING

RECORDING

Press Record.

Since Dallmeier invented the world's first video sensor with digital image memory in 1992, our recording solutions have been leading the industry. The Dallmeier recording technology around the SMAVIA Recording Server Software offers the right solution for every application:

- The VideoNetBox III for small to medium-sized environments
- The IPS 2400 (Rackmount) and DMS 2400 (Standalone) for medium and large environments
- The IPS 10000 system for the highest demands in large environments
- The VM version as a virtual machine for ESXi hypervisor, on Dallmeier servers or for customer's own server environments
