

VMP-9000 Plus Portable fold walk through metal detector

Advanced technology

- Multi-detecting zones technology: 8,16,24 detecting zones, it can be shifted and selected intelligent(more zones update technology can be supported) .
- Working frequency: Super range working frequency(0-120),and working environment adaptive function
- Sensitivity of detecting zone: Sensitivity of single detecting zone can reach 355 grade(adjustable).
- Mobile connect technology: Can be controlled by mobile APP.
- Super housing protection technology: IP67 excellent protection(selectivity)
- Self-adaption diagnosis system: When trun on,system will detect adaptively hardware working status
Sthree colors selected avaiable
Color and patern can be customized

Product Advantages

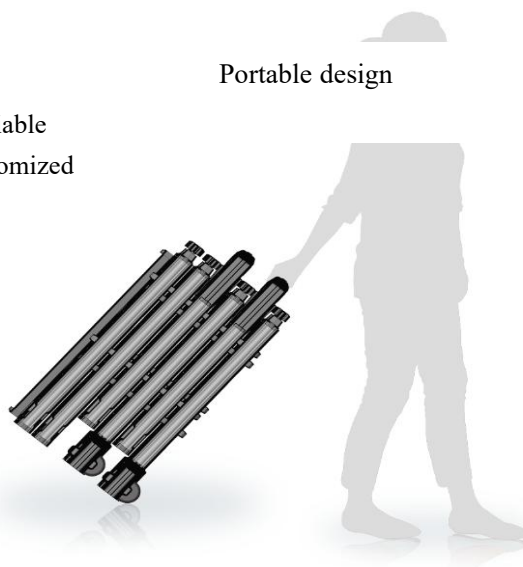

- Adjustment system: System can adjust detecting standard
- Start and stop technology: Red infared device own automatic start and stop technology. It can adds 100 times lifespan.
- Sensitivity of each zone can be adjusted(own adjustment technology)
- Detecting zones quantity can be selected by yourself
- Sound and light alarm. Alarm tones and time can be arbitrarily adjusted.
- Enquiry function: System provided actual time information enquiry function

Portable walk through metal detector

Portable walk through metal detector as one portable and high performance metal detector can be movable,waterproof and portable. It can be taken to any where by one person and ca be installed in five minutes to work. This model can be used in gym,conference hall,school. And it be operated easily no need more training.

This model obtained surface patent and software system registration property. This model detectct metals by electromagnet and alarmed by sound and light if metals overload. It contains CPU,generator,signal receiver, infrared ray sensor. Beautiful surface,strong detecting,more detecting zones,internet remote control management system and waterproof. It can be separated eight parts for better taken and transferred. It's leader of portable walk through metal detector in the market.

Portable design

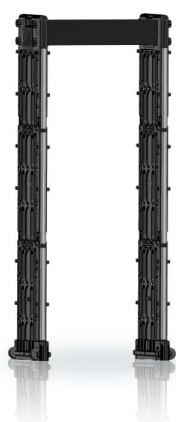

VMP-9000 Plus Portable fold walk through metal detector

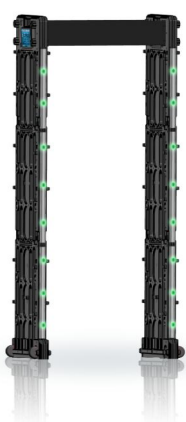

Con-fig 7 inch high definition LCD
screen(touch screen) portable and
more intelligent

Technical parameters:

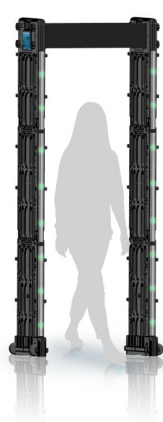

- Detecting target: Contraband goods,more magnet metals;
- Vertical outside size: 2250x850x500mm;
- Tunnel Size: 2051x710x500mm (Width customized range 700~1500mm) ;
- Fold size: 889x606x484mm;
- Package size: 948x666x525mm;
- Working humidity: 99%, no condensing;
- Working temperature: -40℃~85℃;
- Power supply method: Config polymer batteries, last time can be 8、16、24、48、72hours and can be selected;
- Input: AC 110V~240V/50HZ~60HZ
- Output: DC 12V/5A 12W
- Weight: N.W 42KG, G.W 50KG;

Function select

In order to satisfy customers' need, This model kept more hommization function for customer's select. Like: body temperature inspection system, video intercom system, walk through detect video system, face recognition system and etc. More function can be developed according to requirements.

VMP-9000 Plus Portable fold walk through metal detector

Unique feature

- High and low temperature resistance
600T.S Working normally from -40 °C
to 85°C (selectivity)

- Super long time power supply
Config polymer batteries, last time can be 8、16、
24、48、72hours and can be selected;
System can be low battery alarm.

VMP-9000 Plus Portable fold walk through metal detector

Package specification

Fold size: 889x606x484mm

Volume: 0.33m³

G.W: 50KG

Package size: 948x666x525mm

N.W: 42KG
